

UNDERSTANDING MORTGAGE FRAUD WEBINAR

Thursday, September 20, 2012

2:00 – 3:00 EST

According to the FBI's 2010 Mortgage Fraud Report Year in Review (August 2011), mortgage fraud continued at elevated levels in 2010. Although new laws and protections have been put in place to address these scams, Mortgage fraud schemes have been particularly resilient, and have adapted to economic changes and modifications in lending practices. In 2011 alone, the FBI received 93,508 suspicious activity reports relating to mortgage fraud totaling more than three billion in losses.

This webinar will highlight:

- the current trends in mortgage fraud
- examine inflated income or assets
- discuss ways in which documents are altered
- explain the process of flipping a property and how people are scammed by this
- discuss predatory lending
- give examples on how victim service providers or allied professionals can assist victims

If interested in participating either register online by clicking [here](#) or email coletrane@ncpc.org

Hosted by the
U.S. Department of Justice
