

# DON'T GET FOOLED!

If someone can make a product, there's a chance someone else can make a counterfeit version. Moreover, counterfeit goods can be dangerous.

## THEY CAN:

- Cost people their jobs.
- Make money for the gangs and organized crime that trade in them.
- Not perform as expected.
- Hurt people if they catch fire or explode.
- Cheat you out of your hard-earned money.

## TOP TIPS TO HELP AVOID COUNTERFEITS

- Beware of “too good to be true” prices.
- Be careful when buying through foreign sites.
- Purchase from authorized dealers or directly from the manufacturer.

## RED FLAGS TO LOOK FOR

- Check to make sure your battery fits easily in your device.
- Check for overheating.
- Make sure your battery holds a charge.
- Compare logos for consistency.

## SURE-FIRE WAY TO PROTECT YOURSELF

**When in doubt, let the manufacturer check it out.** If you're still not sure, don't hesitate to contact the manufacturer with questions or inquiries. For Canon, you can report any questionable sources or purchases by calling **1-855-46-CANON**.
