Counterfeiters put our health, safety, and security at risk and knowingly steal from valuable brands. Virtually no product category is immune. It’s important for everyone to understand that counterfeiting is not a victimless crime and that fake products can cause real harm.

International organized crime uses the production and sale of counterfeit products to support gun and gang violence, human trafficking and child labor. Don’t be part of that.

Law enforcement cannot solve the risks counterfeits pose to health, safety, and our economy alone.

Fakes are not funny. I know an Intellectual Property expert who went on a raid with her client. A street vendor in New York City broke her arm to “protect” his counterfeit sales.

Help us Take A Bite Out Of Crime® and GO FOR REAL!
THINK YOU CAN'T BE DUPED BY A FAKE?

Dear Future Dupe Detector,

If you are reading this, you either want to learn more about the risks of fake products or how NOT to be DUPED! Either way, you're not alone! According to NCPC's research, one in four teens believes it's important for themselves, their friends, and their families to learn more about counterfeits.

Sure, everyone wants a good deal and not everyone can afford to buy expensive items like electronics, sports gear, or cosmetics. In fact, some teens believe it's okay to buy counterfeits because they work just as well as the real thing, and that saving money is a good reason to buy them. I'm here to tell you, it's not.

Fakes are unregulated, which means they are not tested for quality or safety. They can endanger you, your property, or even your life. Criminals who make them do not care about the well-being of consumers who buy their cheap imitations. Counterfeiters don't care if the fake electronic they sold on the street started a fire, if the fake helmet they sold online put someone in the hospital, or if the person who bought their fake skin cream had to go on medicine to tame the breakout it caused.

When it comes to avoiding fakes, it can sometimes be difficult to tell the difference between what's a real brand and what's a dupe. That's why I'm here - to teach you about ways you can become an official Dupe Detector!

Just follow the tips and activities throughout this Kit to earn your Dupe Detector Kit badge and collect points you can put toward achieving rank as a Master Dupe Detector!

Good luck, Future Dupe Detector!

A super low price on a product that normally costs more is a **RED FLAG** that it’s a counterfeit. Find out what the real thing usually costs. If it seems too good to be true, it probably is. You may think you’re getting a good deal, but what you might get instead is a dangerous **FAKE**.

**Avoid buying something at an unusually low price and you just might avoid a DUPE.**
We asked teens about their knowledge of fakes.

More than 8 in 10 adults and teens agree that counterfeits can cause harm, like injuries...

...but fewer than 1 in 10 chose being "worried about physical harm" as the main reason they would not buy counterfeits. They told us they are getting a deal, and that most fakes work as well as the real thing.

After learning about the shoddy ingredients that go into some fakes and that buying and selling counterfeits is really stealing from the companies they admire, most said they would never buy counterfeits because it simply isn't worth it.

Keep reading to learn more about the dangers of buying counterfeits and how you can protect yourself from making a bad purchase. You'll be glad you did.

° For more highlights from the research NCPC conducted in 2019, click here.
The teens we talked to about counterfeits had a lot to say after understanding the risks of buying fakes. Here are some things they discovered and their advice for other teens and tweens who are thinking about buying counterfeits:

They don’t work.

The differences are intentionally small and easy to miss.

You need to look at everything on the box before you buy something.

You might not be able to return what you paid for if anything goes wrong.

Counterfeiters need to be held accountable.

It’s illegal and the bad guys shouldn’t be able to profit off it.

Pay attention to packaging.

Be aware.

*For more highlights from the research NCPC conducted in 2019, click here.
WHAT’S IN THAT FAKE COLOGNE?

Stay Safe. Buy Real.

FAKES Cause REAL Harm. Buying fake products can cost you the health of your face, skin, and eyes.
Look at the product’s packaging. Did the box come with everything it was supposed to, or were its contents rather skimpy? Sloppy lines, spelling mistakes, unwrapped items, stretched logos, peeling stickers, serial numbers with the wrong number of digits, or other mistakes on a product’s packaging may indicate it’s **FAKE**.

**Detecting tiny clues like misspellings on labels and shoddy packaging can make the difference between getting the real thing and getting DUPED.**

Many real products are made overseas. However, counterfeit products often come from foreign countries, too.* Companies almost always state on their website where their products are made or ship from. Check out the tag and packaging for the product you’ve purchased for country information – if it doesn’t match up, you might have detected a DUPE.

**If a product’s tag or packaging states that the product comes from a country other than the one where the manufacturer says the product is made -- you might be detecting a DUPE from overseas.**

*Annual Intellectual Property Report to Congress (IPRC 2018)*
Faulty electronics cause over 70 deaths and 350,000 serious injuries every year.  
*The Dangers of Fakes (ACG, 2019)*

International organized criminals are turning to counterfeiting to fund their other illegal activities like gun and gang violence, child labor, and human trafficking.

---

**Wait... What’s in this?**

- Go for real
1. A suspiciously low ______ might be a red flag the product being sold is a dupe.
   a. height
   b. mood
   c. price
   d. octave

2. It’s always easy to tell the difference between a real product and a fake.
   a. true
   b. false

3. Counterfeiters take advantage of consumers who are looking for ______.
   a. a lost pet
   b. a bargain
   c. a job
   d. an ancestor

4. Out of the choices below, which does buying counterfeit products contribute to the most?
   a. society in a positive way
   b. a better economy
   c. a fundraising campaign
   d. organized crime, gangs, and other criminal activities

5. When shopping online, you should make sure that any site prompting you to enter financial information begins with “https://” accompanied by a padlock symbol. The “s” stands for ______.
   a. secure
   b. standard
   c. salvageable
   d. sense

6. What do real companies invest in to make sure their branded products are safe?
   a. rental properties
   b. research and development
   c. cheap labor
   d. comfortable office chairs

7. Certain fakes, such as faulty electronics, cause ______ every year.
   a. over 70 deaths and 350,000 serious injuries
   b. late deliveries
   c. global warming
   d. poor grades

8. Counterfeit products are often produced in ______.
   a. the United States
   b. record time
   c. dirty environments
   d. the same way as real products

9. Buying and selling counterfeits is a victimless crime.
   a. true
   b. false

10. Consumers can help stop counterfeiters by decreasing the ______ for fake goods.
    a. size
    b. density
    c. strength
    d. demand

DIRECTIONS:
Click on the response you believe is correct for each question. Audio and visual clues will let you know whether your selections are correct or incorrect.
Good luck, Dupe Detector!

Wait... Will This Work?
If you’re shopping online, you’ll want to see what you’re buying before you pay, right? If the website you’re shopping on shows only a stock image instead of a photo of the actual product, it might be a DUPE. Posting a stock photo is just a shortcut that counterfeiters take to hide behind the fact their product isn’t in fact the actual product.

**Avoid getting DUPED by a site that doesn’t let you see the actual product!**
Before browsing online, make sure your computer's security software is up to date.

Consider alternate payment methods to your personal bank cards, such as prepaid gift cards or disposable debit cards.

Be wary of pop-up and banner ads when shopping online. Many contain false information that may lead you to a malicious site.

Make sure that any site prompting you to enter financial information begins with "https://". The "s" stands for "secure" and is accompanied by a locked padlock symbol.

Don't use the same password for all your purchase sites.

Avoid shopping while on public Wi-Fi and from public computers. If prompted, never save your account information (credit card, password, etc.) to a computer that is not yours.

Beware of counterfeits - fake products that imitate those made by real brands. Authentic brands are indicators of quality and reliability. Companies invest in research and development to make sure their branded products are safe. Buying quality products can mean the difference between safety and serious consequences, like fires or threats to your health.
**ACROSS**

1. Damage to the body which can be caused by a faulty counterfeit
2. Go For _____
3. Another word for shopper
4. A poison used to kill rodents that can cause diarrhea, vomiting, cancer, or death for humans
5. Where lots of counterfeits are sold
6. Lead, mercury, and aluminum are all different types of ______
7. Another word for counterfeit
8. Better to buy from these brands

**DOWN**

1. A breakout on the skin caused by chemicals or bacteria
2. Most counterfeits are made here
5. Another word for counterfeit
9. A cheap copycat
10. Get out and call 9-1-1 if one of these starts

**Word Bank**

- real
- imitation
- rash
- online
- fake
- toxins
- overseas
- trusted
- injury
- consumer
- fire
- arsenic

</table>
Criminals sometimes go so overboard to get someone’s attention that it just may come off as suspicious. They might act overly friendly, lie in order to form an artificial bond with their victims, or offer something --like a good deal -- they know the average person wouldn’t be able to resist.

Counterfeiting criminals offer fake versions of legitimate products. They market these counterfeits at prices that oftentimes are unusually low because they want shoppers to think they are getting a good bargain on a real product. What their victims get instead is a cheap imitation that could put their health or safety at risk.

Counterfeiting is not a victimless crime. Fakes can threaten the health and safety of consumers, hurt the economy, and help fund other criminal activities such as the trafficking of guns, drugs, and people.

The next time someone offers you a deal that seems like it’s too good to be true, it probably is. Use your instincts and the Dupe Detector skills you pick up in this Kit to determine whether the product offered is real or fake. Ask yourself, "Does it seem too good to be true?"

If the answer is, "Yes," it probably is.

*Don’t fall for fake products. Go For Real.*
Real brands invest in research and development to keep you safe. Buying quality products can mean the difference between safety and serious consequences. From catching fire to causing skin rashes, fake products can cause real harm. That's because they are often produced in dirty environments that do not follow safety regulations.

Read through the list of things found in fake products and try to find them all. Words may appear down a column, across a row, diagonally, or even backwards in the puzzle. Some letters may overlap. You can find the solution to this puzzle at [ncpc.org/GoForReal](http://ncpc.org/GoForReal).

For more letter combinations or to change the difficulty level, play online: [thewordsearch.com/puzzle/1845035/find-whats-in-that-fake/](http://thewordsearch.com/puzzle/1845035/find-whats-in-that-fake/).
An unusually ____ ____ on a product that normally costs more is a RED FLAG it might be counterfeit.

Sloppy lines, spelling mistakes, unwrapped items, stretched logos, ____ stickers, serial numbers with the wrong number of digits, or other MISTAKES on a product's packaging may indicate it's fake.

While some real products are manufactured OVERSEAS, a product made in a foreign ____ might be counterfeit.

If the website you're shopping on shows only a ____ ____ instead of a photo of the actual product you're looking for purchase, it might be a DUPE.

If a product is sold "as is," comes without a warranty, or cannot be ____ , there's a strong chance that it's a COUNTERFEIT.

Dear Parent or Caregiver,

Talk to Your Kids about Counterfeit Goods: FAKES Cause REAL Harm

The United States Patent and Trademark Office (USPTO) and the National Crime Prevention Council (NCPC) have uncovered new disturbing data that show teens—for their own health and safety—need more education on the negative impact of purchasing counterfeits and on the importance of buying safe products. According to research conducted for the USPTO and NCPC by the international research firm Ipsos, 81 percent of teens believe that counterfeits can start fires and harm health, but less than 20 percent care enough to change their buying behaviors. These are considerable numbers when you take into account counterfeit goods cost U.S. businesses hundreds of billions of dollars per year.

Ask your kids to take the #GoForRealChallenge to see if they know what's inside counterfeits.

A key focus of the United States Patent and Trademark Office is promoting the importance of making smart buying decisions and avoiding fake-branded products. Commissioner for Trademarks David Gooder commented, “I encourage parents to take the Go For Real Website Challenge with their children. It’s a great way to build awareness and have a conversation about something useful that will help children protect their own lives and future creativity.”

NCPC and the USPTO have created the GO FOR REAL Challenge along with radio ads, digital media content and other tools that you can use with your kids and their friends to discuss this important national media campaign, entitled Go For Real. This public education campaign serves to raise awareness about the dangers of counterfeit goods among youth as well as parents and teachers who, once informed, serve as powerful influencers. With your help, kids and teens will develop safe buying behaviors and avoid purchasing inferior goods that can cause serious harm to their wallets and their health.

The Go For Real Anti-Counterfeiting Campaign targets the following vertical markets:
- Sports equipment
- Cosmetics/personal care products
- Electronics

Please help us shed light on this real problem by educating your kids about counterfeit goods. Join with the USPTO and the National Crime Prevention Council’s McGruff the Crime Dog® in urging your kids and their friends to GO FOR REAL. For more information on ways to bring awareness into your home, visit NCPC.org/goforreal and uspto.gov/trademark/anti-counterfeiting-campaign.

Thank you for your kind consideration. Together, we can Take A Bite Out Of Crime™.

Best regards,
McGruff the Crime Dog®

Juliette Gordon Low
U.S. Patent & Trademark Office

Dear Educator,

The United States Patent and Trademark Office (USPTO) and the National Crime Prevention Council (NCPC) have uncovered data showing that teens — for their own health and safety — need more education on the importance of buying safe products and the negative impacts of purchasing counterfeits. Counterfeit goods cost U.S. businesses hundreds of billions of dollars per year. While research shows that many teens understand that counterfeits can start fires and harm their health, few teens care enough to change their buying behaviors.

The USPTO and NCPC have created the Go For Real campaign to help educate tweens, teens, and their caregivers and educators about the importance of buying real and how to recognize fakes in the marketplace.

**NOW AVAILABLE:** New teaching tools for in-school use and remote learning, including the Go For Real “Dupe Detector Kit,” an interactive, digital e-book, and accompanying online shopping game. These resources are designed to help raise awareness about the consequences of buying counterfeit goods, and provide tips on how to spot fakes and shop smart!

**CLICK HERE FOR FREE RESOURCES AT YMICLASSROOM.COM/GO-FOR-REAL**

We hope that you will share these educational resources with your colleagues and parents at your school. Please take a moment to share your thoughts about the program by visiting ymiclassroom.com/feedback-go-for-real. We look forward to hearing your comments.

Sincerely,

Dr. Dominic Kinsley

Test your shopping smarts with the Dupe Detector Game!
Will you be duped by clever fakes, or will you stop the scammers?

- **Where does the product ship from?**
  Is it coming from a sketchy address?

- **Read the product description carefully.**
  Are the grammar and vocabulary correct?

- **If reviews are included, are they realistic?**
  Again—if it sounds too good to be true, it probably is!

- **Are there high-quality product images?**
  Or is the seller using stock photos available online?

- **Is the price ridiculously low?**
  Then it’s almost guaranteed to be a scam. It’s true:
  You get what you pay for!

- **Is sales tax calculated and shown?**
  Legitimate companies won’t forget to include that information!
DID YOU BUY A FAKE HELMET?

Fakes Fail.
Buying quality products can mean the difference between safety and serious consequences. When you buy real, you support the brands that make quality goods that might just save your life... if not your pride.

NCPC.ORG GO FOR REAL
GO FOR REAL

Counterfeits aren’t generic brands. They’re cheap imitations of brands we trust.

In addition to funding criminal enterprises, counterfeit scams drain the economy, cost Americans real jobs, hurt businesses, and dupe consumers. As if that weren’t enough, certain fakes, such as faulty electronics, cause over 70 deaths and 350,000 serious injuries every year.

Why risk it? #GoForReal and buy from brands you trust.

The U.S. Patent and Trademark Office (USPTO) and the National Crime Prevention Council (NCPC) are working together to raise public awareness about the importance of intellectual property and to decrease demand for counterfeit goods in the United States.

STOPfakes.gov

This public education campaign is aimed at tweens and teens, encouraging them to make smart buying decisions and seek out legitimate products.

Learn more about fakes and take the #GoForRealChallenge at https://www.ncpc.org/goforreal.

Protect your inventions and brands at https://www.uspto.gov.

Combating Trafficking in Counterfeit and Pirated Goods

This report helps to develop a deeper understanding of the importation and sale of massive amounts of counterfeit and pirated goods.
I am delighted to have introduced the Go For Real Anti-Counterfeiting Campaign along with this Dupe Detector Kit. NCPC is proud to contribute to the success of our nation’s Intellectual Property (IP) industry with our very own trademarks: McGruff the Crime Dog, his nephew, Scruff®, and his message to “Take A Bite Out Of Crime®,” among others.

A “global leader and standard setter for the protection and enforcement of IP rights,” the USPTO and IP-intensive industries it supports contribute 27.9 million direct jobs and 17.6 million indirect jobs to the U.S. economy, for a total of 45.5 million jobs overall. In addition to providing approximately 30% of all employment nationwide, IP industries add $6.6 trillion in gross domestic product to the U.S. economy.*

Given the integral part it plays in the U.S. economy, IP theft is not only a crime; it poses a threat to brand reputation, Americans’ health, safety, and jobs as well as our economy. Most consumers don’t realize that in many cases, purchasing counterfeit products means contributing to organized crime, gangs, and other criminal activities. That is why the USPTO and NCPC are working together to raise public awareness about the importance of intellectual property and to decrease demand for counterfeit goods in the United States.

We hope you have enjoyed this Dupe Detector Kit and learned ways to keep yourself and your family safe from the harms of counterfeit goods. With the help of young consumers, parents, educators, law enforcement, and the IP industry. The USPTO and NCPC will help protect teens and tweens by achieving our ultimate goal: to change consumer behavior.

Ann M. Harkins
President and Chief Executive Officer

McGruff’s® Golden Rule? Don’t be fooled. Blaze through these scenes to learn how to not crash and burn. Think you have what it takes to fill in the blank?

1. Your buddy purchased a smart phone online, without researching the seller. They tell you that although it was a great deal, the phone echoes, the screen already broke, and it feels rather warm. In fact, you happen to be at their house when it actually catches fire! After calling 911 for the local fire department, you should call the __________, and report the incident involved a counterfeit phone. (After you stop, drop and roll, of course.)
2. Madison has the most Instagram likes. Madison has the prettiest smile. Madison has the best clothes. Madison has a seemingly perfect teenage life until her brother Matthew buys a virtual reality headset from a shady salesman selling pirated electronics out of the back of his truck. Once connected through a USB cable to the family computer, Matthew's new malware-infected USB downloads the family's personal information, it's collected and sold on the _____ ____. Now Madison's unedited and deleted pics were posted to Instagram because of malware. Her credit cards were used to purchase thousands of dollars of merchandise online! The family is in total freefall, working with law enforcement and their banks to freeze all bank, debit and credit card accounts -- to safeguard what finances they have left.

Madison had the worst day. Ever.
3. The school dance is coming up, but Jasmine’s go-to shade of lip gloss has been discontinued by her favorite brand. Ignoring warnings about sketchy online cosmetic purchases, she buys a tube from an unknown online seller and it arrives the day of the dance. But when she applies it, a ___ ___ breaks out on her lips. Not very Instagram-worthy, was it?
4. Your parent is worried about injuries and bans you from skateboarding. All your friends are doing it, safely, with helmets. You decide to snag one secretly. Without a driver’s license, your buying options are limited. You can’t risk ordering one online, having it shipped directly to your house. But you also aren’t able to afford the pricey ones sold in the shop around the corner. A friend of a friend says they’ll sell you a name brand helmet for a third of the price. It doesn’t come in a box, the logo looks fishy, but you buy it. Half an hour later at the skate park, you attempt a wallride, land on your head, the helmet splits in half, and you’re now traveling in an ambulance to the ___________ ___________ ___________.

5. David wants to impress the kids in his fancy new school district with some fresh, new $200 kicks, but he blew his allowance on video games and convenience store runs. His cousin Tia said she purchased a knockoff handbag that, “looked like the real thing,” even though the “real thing” would’ve cost nearly $1,000. Tia encourages Ethan to buy a pair of imposters, or ________, at the flea market where she purchased her purse. On the first day of school, David struts in with his snazzy sneakers, the stitching unravels, and the left shoe falls apart. Way to make a first impression, Dave-O!

2. Counterfeit sports gear includes items like shoes, helmets, bats and _______.  
3. Whom you call to file a report about scams.  
5. Chemicals used in fake skincare products may be ______ and not safe for your skin.  
6. If it's too good to be true, it's probably a _______.  
10. To nag; a type of dog  
11. The kind of burglar found in 'heist' movies  
12. The droppings of this animal are found in some counterfeit cosmetics.  
13. It's cheap, fake, and a replica of the original  
14. Fake electronics with faulty wiring may catch on _______.  
15. Neither a child or teenager, but between  

1. This sneaky computer software may be included with fake electronic products or dubious downloads, and is designed to wreak havoc.  
2. Take A ______ Out Of Crime.  
3. Your device and website ______ should include numbers, letters and symbols.

Monthly Go For Real Checklist

www.ncpc.org/goforrealtoolkit/dupe-detector-kit/

☐ Change your passwords monthly, and remind yourself to stay away from sketchy online vendors whose websites have tons of misspellings, fuzzy product photos, and nothing but top-notch reviews.

☐ It’s easy to get swept up in trends, but if something is priced too low and it seems too good to be true, it’s probably too shady to buy. Think about this before “adding to cart.”

☐ No mention of sales tax on online purchases? That’s a big, red flag.

☐ Remind your friends that it’s just not worth it buying fakes. Buy a cheap counterfeit, and you’ll probably have to buy a similar item once the counterfeit falls apart.

☐ When adding songs to your playlist, make sure you purchased legal downloads — and didn’t just snatch them off the internet. You wouldn’t want someone stealing your ideas, or your money. That’s what happens when music is pirated.
